First of all there is physical weak-Prist of all, there is physical weak-ness." Many'of the greatest of God's wearflors have been very weak and feeble creatures physically. What-ever they may have been in spirit, in the body they bave often been ittle more than shadows. It is well in the more than shadows. It is well known that, among the most triumphant of the martyrs of the early Church; there were delicate girls and little children, and that both men and women arose from beds of pain and weakness to go to the rack and the stake for their

The history of the world teems rith examples of great works accompashed for God and man by those who were dying by inches while they wrought them, and whose flickering lives became literally, the vital force of the services they ren-dered. Nor does this apply only to the past, for unto this very day the past, for unto this very day we have constantly before our eyes the achievements of those who are the weak, the delicate, the sick, who are the feeble folk of The Salvation

For here, again, God has "chosen the weak things of the world to con-found the mighty; and the things that are not to bring to nought the things ithat are." How many people I have known—I do not need to go further afield than my own observa-tion 'in' this matter—whose mental powers have been of the very simp-lest type; people who have had prac-tically no education, no reading, of

leat type; people who have had practically no education, no reading, on mental training; and yet who will not have been mighty with "the mind that was in Christ". Now, I am well aware that such a iransformation as this can only be accomplished by, dint of industry, patience, self-restraint, self-control, and the self-restraint, self-control, and the self-restraint, self-control, and the self-restraint, self-control, and the will have been the self-restraint, self-control that these means alone would not have sufficed to bring about such a change as I have described. Indeed, those means would probably never have been employed even, much less than the self-restraint of the present of that other forcestally proposed in all this was faith in God-sally on the presence of that other forcestally proposed in all this was faith in God-sally and the presence of that other forcestally proposed in all this was faith in God-sally and the presence of the other forcestally proposed in all this was faith in God-sally and the presence of the other forcestally proposed in all this was faith in God-sally and the presence of the other forcestally proposed in all this was faith in God-sally and the presence of the other forcestally proposed in all this was faith in God-sally and the presence of the other forcestally proposed in the control of the other forcesta

Marvels of Baith

And yet, look at the marvels which have been wrought by faith even here. That man with the weak even here. That man with the weak and imperfect will, the wobbling na-ture, with all his uncertainties of choice, the wavering mind and un-fixed purpose—I see to-day that he has been completely transformed. That woman whose whole being a That woman whose whole being a little while ago seemed but a flood of emotion, I see her to-day with a renewed mind; with an inflexible determination, and I find her pointing to covenants in her life which she is able to declare have never been broken, while those for whom she labours find her abounding in the love of God and of her fellows, steadfast and unmovable in her devotion as the mountains that are

Ont of their weakness—weakness of will weakness of affection weakof will, weakness of affection, weak-ness of purpose, weakness of oberac-ter of one kind or another — these people have been made strong.

Then I must also name spiritual weakness. Long after men are saved-yea, often after they are sauctified—there still remain spiritual weaknesses and infirmilies is their weaknesses and infirmilies in their nature, which are amongst the greatest trials that fall to the lot of sincere, souls: It is this form of weakness which gives the tempta-tions of the world, the flesh, and the levil their graphing point. We are sver assaulted where we are the ever assaulting where we are the weakest; the struggle is always most savare at the point where we are most-likely to fail. It is, above all others, at that weak point that we must win, or all will be lost

Now, I am very far from limiting the power of God. I do not know Control to Control and Control

But I am not thinking just, now of that "I am thinking rather of those experiences in which personal trials and strong temptafor the very reason that, in spite of them, we may prove victors.

The "Thorn in the Blesh"

I do not know what that sore trial I do not know what that sore trial was which Paul called the "thorn in the flesh." It may have been some physical infirmity, it may have been some moral weakness or insufficiency intimately associated with his spiritual life, and with his work as an Apostle! All that we know is, that he cried to Coal thrice that is an Apostec. All that we know sight he need to God three that it might be removed to fit it was not to the sight he need to be not the sight he need to be not taken away, it received a kind of confermation from God as a part of the Apostle's life. "My grace is sufficient for thee," He said. In other words, Paul was to be made strong while in his weakness; he was to struggle on, conquering, not by reason of his strength not by reason of his strength not by reason of his sering his not his property of the substruction of the sight in the substruction of the sight in the conquering by simple, childlife, common-place faith in the ever-present power of his Saviour's grace. Bandsman and Songster,

His Royal Highness The Duke of Connaught

In The Departure From Canada of Their Royal Highnesses The Duke and Duchess of Connaught. The Salvation Army in The Dominion Loses Very Warm Friends

Note departure of His Royal Highness the Duke of Contunght, The Salvation Army in Canada Loses a very succer admirer and warm friend. On several occa-sions His Royal Highness, as the Governor-General of Canada, has received the Lenders of The Salvareceived the Leaders of The Salva-tion Army, and in the most out-spoken and gracions manner, ex-pressed his appreciation of what The Army is doing for the Dominion. While Delegates, were assembled

in Congress from all parts of the world in London during the year 1914 the Duke sent to The General the following gracious message;-

On the occasion of the later intional Congress of The Salva-tion Army, I send you my sincer-est good wishes, and trust that est good wisnes, and trust that your meetings may have the best results. I cannot let this occa-sion pass without expressing to you my distress at the tragic chrou my distress at the man comstances which have prevented a fuller representation of The Salvation Army from Canada, where its splendid work is so thoroughly appreciated.

But, perhaps, the most impressive expression of his interest was a visit, at his own wish, to The Army's Institutions in Montreal. This event was reported in "The War Cry" at the time, from which we take the following extracts:—

His Royal Highness the Duke of

His Royal Highness the Duke of Connaught, Governor-General of the Command, Covernor-General of the Dominion, has given further evidence of his warm sympathy with the work of The Army by visiting this own expressed wish, several of our Social and other Institutions in

Montreal,
The visit, which took place on
Priday, Dec. 5th (1913), was emirely due to a desire on the part of the Governor-General to become more Governor-General to become more intimately acquainted with Salvation intimately acquainted with Salvation Army efforts in the metropolitan city. His Royal Highness, who has seen our Institutions in other lands, has from time to time given cordial expression to his feelings, regarding their influence. "And 1, too, am a friend of The Army," he quickly replied when, shortly after his arrival Canada one of our Omcers waitin Canada, one of our Omcers water-ed upon him and, in conversation, mentioned the deep interest with which His Majesty the lamented King Edward, Queen Alexandra, King George, and Queen Mary had followed the work of our late Genfollowed the work of our late Gen-eral. On that occasion his Royal Highness also said that he hoped he might be able to serve the Move-ment during his stay in Canada. Accordingly, a few days before the present visit of His Royal, High-

Although her health is not yet sufficiently restored to allow her to come to Montreal, I am happy to be able to inform you that abe has made good progress towards recovery since our return to our Canadian home. Among our chief consolations during this protracted illness, bave been the messages of sympathy, so numerous and so sincere, that have reached us from all parts of the Dominion.

'As far as your work in Montreal is concerned, it is, I hope, innecessary for me to assure you of the very great interest I take in the minds of Canadians is that of their ever-increasing uptan population. I are convinced that unless this problem is thought out with foresight and thoroughness, the question of slums and that of unemployables will arise here as it has arisen in Europe. I am particularly interested at hearing of your methods of assisting the wives and children of men serving sentences of imprisonment. In my position I have exceptional opportunities of realizing the distress and suffering caused to innocent women and children when the hread-winner of the family has, unfortunately, got into trouble.

HEATHEN WON FOR GOD

We rejoice to report splendid soul-saving times at Camp Hughes. Clory to God! Just recently some of our comrades, under the leader-nip oi Brother Hargicaves (Happy Cbarlic), held a Hoimess meeting in the bush. Some of these dear comrades were engaged in talking to their Heavenly Father—the praying quartette being Brothers Har-greaves, Andrews, Hammond, and quartette being Brouners nar-greaves, Andrews, Hammond, and Diamond. So engaged were they, in fact, that they thought they were the only persons present. But evidently others had heard their fervent supothers had heard their fervent sup-plications to Almighty God, for when they arose from their knees, behold, some four or five khaki boys schold, some tour or five khaki boys stood around watching the proceed-ings. One of these proved to be a man named Stapleton; a backslider from a Western Corps. This pre-cious soul was faithfully dealt with, chous sour was maintainy usan win, and eventually he knelt and surren-dered his all to God, and there in the bush received the kiss of reconcilia-

GRASP THE NETTLE"

The quietude with which Prohibition came into effect in Ontario should serve as an object lesson to legislators. The nettle, when boldly grasped, bas no sting; and many other public evils, if grappled with in a coorageous fashion, would submit quietly to the will of the public. We think that the day of the saloon bar bas gone for ever, as the benefits arising from Prohibition will be so many that no community will desire to restore them.

We hope that soon drastic legislation and a vigorous application of the same will be directed towards the moving-picture shows. THE ANNUAL HOME-CLEANING

HE ANNUAL CLEANING is doubtless a topic which most wives and mothers have their own particular ideas about, and cbug tenaciously to the belief that their own way whether angient or modern i way, whether ancient or modern, is certainly the very best, and yet, in this ordinary domestic matter, we all certainly have very much to learn. While many err on the side of "my own way is best," experience, gained through mingling with all sorts and conditions of wives and sorts and conditions of wives and mothers, and meeting them in their own homes, teaches that there are a great crowd of splendid honsekeepers who altogether under-esti-

mate their own abilities and gifts in this direction, and cannot be per-suaded to "presume" even to at-tempt to teach others. In the matter of home cleaning it is just the same; such different ideas and methods prevail, though often the lack of method is the one orten inc lack of method is the one weakness of it all. And yet to one willing to learn, what valuable information can be gathered often from a source least expected. often

This annual cleaning one frequently hears described as "just turning the whole place upside down"; the entire business is undertaken in a reedless kind of mandertaken in a reckless kind of man-ner, much to the disconfort and dismay of every member of the household, including "the presiding genius" of the home, who has a miserable time of it, and often fin-ishes up by declaring herself "half-dead."
